

MURALA CHINNI SPANDANA

+91 7799179569 | mcspondana12@gmail.com | linkedin.com/in/spandana-murala | github.com/spandana162 | Hyderabad, India

Summary

Computer Science (Cybersecurity) undergraduate graduating April 2026, seeking a Software Development Engineer role. Built and shipped full-stack and backend systems in Java, Spring Boot, React and Node.js across two internships. Solved 700+ data structures and algorithms problems. Comfortable owning a feature end to end: design, implementation, testing and deployment.

Technical Skills

Languages	Java, Python, JavaScript, SQL, C, C++, PHP
Backend	Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication, RBAC
Frontend	React, HTML5, CSS3, Tailwind CSS, Next.js
Databases	MySQL, MongoDB, Supabase, Query Optimization, Indexing
Tools	Git, GitHub, Linux, Postman, VS Code, Burp Suite
Concepts	Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Agile, Unit Testing

Experience

IBaseIT

Mar 2025 – Sep 2025

Penetration Testing Intern

Hyderabad, India

- Tested two enterprise web applications end to end, designing **50+ test cases** from scratch with no existing checklist; identified **10+ access-control defects** before production release.
- Validated role-based access control across three privilege levels by manipulating session tokens and request parameters, uncovering broken access control, session hijacking and SQL injection issues.
- Partnered with developers across two sprint cycles to verify fixes, **reducing failed re-tests by 20%**.

SkillDzire

Jan 2024 – Apr 2024

Full Stack Developer Intern

Remote

- Designed and built **3+ REST APIs** in Java and Spring Boot within two-week Agile sprints, **cutting API response time by 30%** through profiling and refactoring hot paths.
- Optimized MySQL queries using multi-table joins and targeted indexing, **reducing data retrieval time by 25%**.
- Shipped every assigned feature with **zero critical defects** at release, applying input validation and code review.

Projects

Gesture Math Solver — Real-Time Computer Vision Desktop Application

Python, OpenCV, MediaPipe, NumPy

- Engineered a hands-free calculator that recognises digits and operators from live webcam hand gestures using **21-point MediaPipe landmark tracking**, achieving real-time performance at 30 FPS.
- Refactored a 149-line prototype into **16 modules** with type hints and a **17-case unit test suite**; replaced unsafe `eval()` with an **AST whitelist evaluator**, eliminating a code-injection vulnerability.
- Implemented a multi-threaded capture pipeline that drops stale frames to keep input latency low, and a hold-to-lock gesture state machine that removed duplicate-input errors.

AI Interview Platform — Full-Stack MERN Application

React, Node.js, Express, MongoDB

- Built a role-based interview preparation platform serving **three user roles** (Admin, Recruiter, Candidate) from one codebase, with JWT authentication and bcrypt password hashing.
- Integrated an LLM API to generate adaptive interview questions and analyse free-text responses, plus an in-browser code editor for technical practice.

AgriCare — Deep Learning Image Classification System

Python, TensorFlow, CNN, Streamlit

- Trained an EfficientNet CNN with transfer learning to classify rice leaf diseases at **98% accuracy**; added Grad-CAM visualisation to make predictions explainable and severity-based treatment output.

LostNFound — Campus Lost-and-Found Web Platform

PHP, MySQL, JavaScript, Bootstrap

- Developed a secure item-reporting portal with authentication, an admin dashboard and a normalised relational schema optimised with indexed multi-table joins for fast search.

Education

Shri Vishnu Engineering College for Women (SVECW)

Oct 2022 – Apr 2026

Bachelor of Technology (B.Tech), Computer Science and Engineering (Cybersecurity); CGPA: 8.85/10

Bhimavaram, India

Achievements and Certifications

- **700+ DSA problems solved** across LeetCode, HackerRank and CodeChef; HackerRank Problem Solving **Silver Badge**.
- **Finalist**, PRAJWALAN 2K24 National Hackathon.
- **Certifications:** Google Cybersecurity Professional; IBM Cybersecurity Analyst Professional; Oracle SQL; Google Generative AI; Fortinet Network Security.
